<https://github.com/google/skia>

<https://github.com/dart-lang/sdk>

The screenshot shows the GitHub repository for Flutter. At the top, there's a navigation bar with links for Pull requests, Issues, Marketplace, and Explore. Below this, the repository name 'flutter / flutter' is displayed with statistics: 1,363 Unwatched, 31,414 Unstars, and 2,842 Forks. The 'Code' tab is selected, showing 3,421 Issues, 58 Pull requests, 16 Projects, and 1 Wiki. A description states 'Flutter makes it easy and fast to build beautiful mobile apps.' with a link to 'https://flutter.io'. Below this are tags for 'mobile', 'android', 'ios', 'material-design', and 'dart'. Statistics show 11,263 commits, 16 branches, 60 releases, and 214 contributors. A table of recent commits is visible, including files like .github, bin, dev, examples, packages, .cirrus.yml, .coveralls.yml, .gitattributes, .gitignore, .travis.yml, AUTHORS, CONTRIBUTING.md, LICENSE, PATENTS, README.md, analysis\_options.yaml, analysis\_options\_repo.yaml, appveyor.yml, flutter\_console.bat, and README.md. At the bottom, there's a section for Flutter with a logo, a 'chat on gitter' link, and build status indicators for 'build' (passing), 'CI' (passing), and 'coverage' (100%). A footer note mentions 'A new mobile app SDK to help developers and designers build modern mobile apps for iOS and Android. Flutter is an open-source project currently in beta.'

README.md

Flutter chat on gitter build passing CI passing coverage 100%

A new mobile app SDK to help developers and designers build modern mobile apps for iOS and Android. Flutter is an open-source project currently in beta.

## Framework (Dart)

## Engine (C++)

```
basic.dart x container.dart
3773 /// [mainAxisAlignment] is [MainAxisAlignment.spaceBetween], any vertical
3774 /// space that has not been allocated to children is divided evenly and
3775 /// placed between the children.
3776 ///
3777 /// See also:
3778 ///
3779 /// * [Row], for a horizontal equivalent.
3780 /// * [Flex], if you don't know in advance if you want a horizontal or vertical
3781 /// arrangement.
3782 /// * [Expanded], to indicate children that should take all the remaining room.
3783 /// * [Flexible], to indicate children that should share the remaining room but
3784 /// that may size smaller (leaving some remaining room unused).
3785 /// * [SingleChildScrollView], whose documentation discusses some ways to
3786 /// use a [Column] inside a scrolling container.
3787 /// * [Spacer], a widget that takes up space proportional to its flex value.
3788 /// * The [catalog of layout widgets](https://flutter.io/widgets/layout/).
3789 class Column extends Flex {
3790   /// Creates a vertical array of children.
3791   ///
3792   /// The [direction], [mainAxisAlignment], [mainAxisSize],
3793   /// [crossAxisAlignment], and [verticalDirection] arguments must not be null.
3794   /// If [crossAxisAlignment] is [CrossAxisAlignment.baseline], then
3795   /// [textBaseline] must not be null.
3796   ///
3797   /// The [textDirection] argument defaults to the ambient [Directionality], if
3798   /// any. If there is no ambient directionality, and a text direction is going
3799   /// to be necessary to disambiguate `start` or `end` values for the
3800   /// [crossAxisAlignment], the [textDirection] must not be null.
3801   Column({
3802     Key key,
3803     MainAxisAlignment mainAxisAlignment = MainAxisAlignment.start,
3804     MainAxisSize mainAxisSize = MainAxisSize.max,
3805     CrossAxisAlignment crossAxisAlignment = CrossAxisAlignment.center,
3806     TextDirection textDirection,
3807     VerticalDirection verticalDirection = VerticalDirection.down,
3808     TextBaseline textBaseline,
3809     List<Widget> children = const <Widget>[],
3810   }) : super(
3811     children: children,
3812     key: key,
3813     direction: Axis.vertical,
3814     mainAxisAlignment: mainAxisAlignment,
3815     mainAxisSize: mainAxisSize,
3816     crossAxisAlignment: crossAxisAlignment,
3817     textDirection: textDirection,
3818     verticalDirection: verticalDirection,
3819     textBaseline: textBaseline,
3820   );
3821 }
```

The screenshot shows the GitHub repository for the Flutter engine. At the top, there's a navigation bar with links for Pull requests, Issues, Marketplace, and Explore. Below this, the repository name 'flutter / engine' is displayed, along with statistics: 149 Unwatch, 1,570 Stars, and 508 Forks. The 'Code' tab is selected, showing the repository's description: 'The Flutter engine' with a link to 'http://flutter.io'. A 'c-plus-plus' badge is visible. Below the description, a progress bar shows 10,260 commits, 4 branches, 6 releases, and 164 contributors. A 'New pull request' button is present. The 'Files' tab is active, displaying a list of files and their commit history. The files listed are: assets, build/dart, common, docs, examples, flow, flutter\_kernel\_transformers, fml, frontend\_server, glue, lib, runtime, shell, sky, and synchronization. Each file entry includes a brief description of the commit and the time since the last commit.

| File                        | Commit Description   | Time since last commit |
|-----------------------------|--|------------------------|
| assets                      | Replace AssetResolver GetAsBuffer with GetAsMapping. (#5546)               | 17 days ago            |
| build/dart                  | Declare that a pubspec.yaml file is being generated for a dart_pkg. (#...  | 4 months ago           |
| common                      | Revert "Eliminate support for Dart 1 (#5504)" (#5505)                      | 25 days ago            |
| docs                        | Minor update to README (#5003)   | 3 months ago           |
| examples                    | [fuchsia] Removed the flutter_app template. (#4511)                        | 6 months ago           |
| flow                        | [fuchsia] Update gn label for fuchsia.ui.scenic (#5673)                    | 3 days ago             |
| flutter_kernel_transformers | Synchronizes analysis_options.yaml files, and turns on Function typed...   | a month ago            |
| fml                         | IsolateNameServer reland (#5519)   | 23 days ago            |
| frontend_server             | Roll dart sdk to 64641d014b77bd410e9aa10558522ae26e4210ee (#5610)          | 3 days ago             |
| glue                        | Adjust to thinner Fuchsia sysroot. (#4624)                                 | 5 months ago           |
| lib                         | Revert "Add antiAlias and saveCount to clipPath and restore (#5638)" (#... | 4 days ago             |
